

# GRANT STRATEGY PACKAGE

**One Process. Lasting Grant Success.**

Need to improve your nonprofit's grant outcomes? The Grant Strategy Package (GSP) is designed to increase your chances for funding on the philanthropic market. The GSP strengthens your case for investment, identifies your most saleable outcomes, and targets the funders most aligned with your work. Here is what you get:

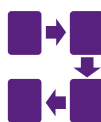

## Grant Narrative

We help you tell your story by creating a comprehensive, point-in-time narrative that includes everything funders want to see – history, mission, vision, community needs, programs, outcomes and your plans to sustain the effort.

## Grant Budget

Creating a budget that matches your narrative is critical for a competitive grant. Our process helps you describe your financial story to best describe your goals in a way that supports your request.

## Grant Outcomes Road Map

Your theory of change needs to match the story that you are telling about your organization. This road map includes an assessment of your current outcome measures framework and provides a revised logic model for use in grants.

## Grant Opportunity Report

Based on comprehensive research on which funders align with your mission and priorities, this report identifies local, regional, and national grantors who may be interested in supporting your programs.

## Is this process for you?

Your organization lacks the resources to improve your grant strategy

Your staff and volunteers lack the necessary grant development experience

Your organization needs to increase its grant revenue

**The Grant Strategy Package is an affordable solution to increase your grant success!**
